

**UPDATE ON COVID-19
ANTIGEN TESTING AVAILABLE AT ALL OUR CITY PROPERTIES**

Dear guest,

At Posadas, we have created the **Travel with Confidence** program in collaboration with 3M and supported by ABC Medical Center, implementing the most effective cleaning and sanitizing measures to offer you memorable experiences in a completely safe environment.

As an additional precaution, from January 26th, a 3-night stay (or longer) at our Live Aqua, Grand Fiesta Americana and Fiesta Americana urban properties will include antigen testing at no additional cost upon request, considering that some countries are now requiring a negative Covid-19 test with a validity of 72 hours for travelers arriving via air.

At our Fiesta Inn, Gamma, and one properties, we are able to assist you with information from local labs that can perform antigen or PCR tests inside hotel facilities during your stay. Upon your arrival at all our urban hotels, please contact one of our staff members, who will help you schedule your appointment. This service has an additional cost, and is subject to availability. Remember to check all test requirements and specifications in the official media of the country you are traveling to.

We recommend you to acquire the **Travel with Confidence Protection** when you check in, our own insurance program that covers any accidents or illnesses you may suffer during your stay at any of our hotels, including Covid-19. As part of this insurance, we offer a 50% off special accommodation rate per night, per person, if you test positive to Covid-19, so you can recover during your quarantine period in the hotel facilities.

If you present any symptoms related to Covid-19, please alert one of our staff members so they can assist you and find a suitable solution. Customers are our top priority and we are more than happy to welcome you.

Sincerely,

Enrique Calderón
Chief Operating Officer
POSADAS
